Invitation

Dear Colleagues,

Greetings from Mumbai!

Over the last 2 decades, we have seen a surge in arthroscopic surgeries in India which have revolutionised the management of orthopaedic and sports injuries, enabling faster healing and quicker recovery. With the advancements in the field of arthroscopy, optimum preservation of function and early return to sport has been possible. Our continued efforts and determination to improve active individuals' quality of life and allow the athletes to return to their pre-injury status have shifted our attention to a deeper understanding of anatomy and biomechanics.

This year with our first post-pandemic meeting of Arthroscopy Academy, we are taking you "Back to Basics" of knee and shoulder arthroscopy and sports medicine. With this theme in mind, we will focus on the basics of ACL, meniscus, alignment, rotator cuff, shoulders stability, and biomechanics in the upcoming 8th Meeting of the Arthroscopy Academy. This academic extravaganza will exhibit more than 20 live surgical demonstrations, didactic presentations and panel discussions, cadaveric hands-on workshops, as well as an opportunity to interact with reputed faculties and our colleagues across the country. We eagerly wait to greet you in Mumbai.
